***Detailed Action***

***Response to Amendment***

1. Applicant's Remarks/Arguments filed on 7/25/2008 regarding claims 37-64, 66-104 have been fully considered. Claims 1-36, 65 have been cancelled by applicant.

***EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE***

2. The following is an examiner's statement of reasons for allowance:

The present application relates to providing a method for data transmission in a mobile radio system, including the unique steps of:

“switching, during interruption phases, the mobile station to reception of the data packets to be detected and transmitted by the second base station using the second transmission method, wherein the reception of data packets to be detected and the characteristic data packets occurs in parallel; and

using knowledge about a frame structure of the data packets transmitted by the second base station in order to reduce a maximum effective total duration of the interruption phases.”

The closet prior art, Ranta et al. (USP 6,308,066), discloses a method for receiving frequency correction channel packets from neighbor base station when the reception of information from the current base station is temporarily interrupted. However, Ranta fails to anticipate or render obvious the above quoted limitations of the present application. This renders the claims allowable.

Art Unit: 2616

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
